

PERIPHERAL DOORS

As your solution provider, we focus on both quality and design. We can offer you a wide range of products for peripheral doors, such as bathroom doors, interconnecting doors, storage room doors, conference room doors, staff entrances, offices etc. We will provide you with hardware that has a consistent style throughout your property. Various standards are included in our product range, such as ANSI, EURO, SIS, DIN, Knob Locks etc.

Our membership in the ASSA ABLOY Group gives us access to many different products from a variety of companies.

Contact us for your customized solution.

Since pioneering the hotel card lock industry more than 20 years ago, VingCard has supplied nearly 50% of the total installed base of hotel card locks around the globe. That's more than 3 million locks in 137 countries! By purchasing VingCard products, you'll get the added peace of mind that comes with working with the worldwide market leader. As a dedicated part of your security team, VingCard is committed to your locking system products 24 hours a day, 365 days a year.

Accessories

by VingCard

We are offering you a solution for your property that meets all your security hardware needs. You can continue the VingCard design throughout your property with additional hardware in the same style and finish as your VingCard guestroom lock.

Unlimited possibilities – customized solutions.

VingCard is the world leading manufacturer of card operated locking systems for the hotel and cruise industry. Nearly 3 million locks are installed in properties in 137 countries. VingCard's operation also comprises Elsafe International a.s, the internationally renowned in-room safe manufacturer.

The companies' international network consists of 12 subsidiaries and another 75 distributors.

VingCard is part of the ASSA ABLOY Group, the world's leading manufacturer and supplier of locks and associated products, dedicated to satisfying end-user needs for security, safety and convenience.

Remote Controller

This independent unit provides access control on common doors, such as vehicle barriers, health clubs, conference suites, staff entrances or guest night entrances. VingCard's Remote Controller is fully compatible with VingCard card locking systems.

Door Closer

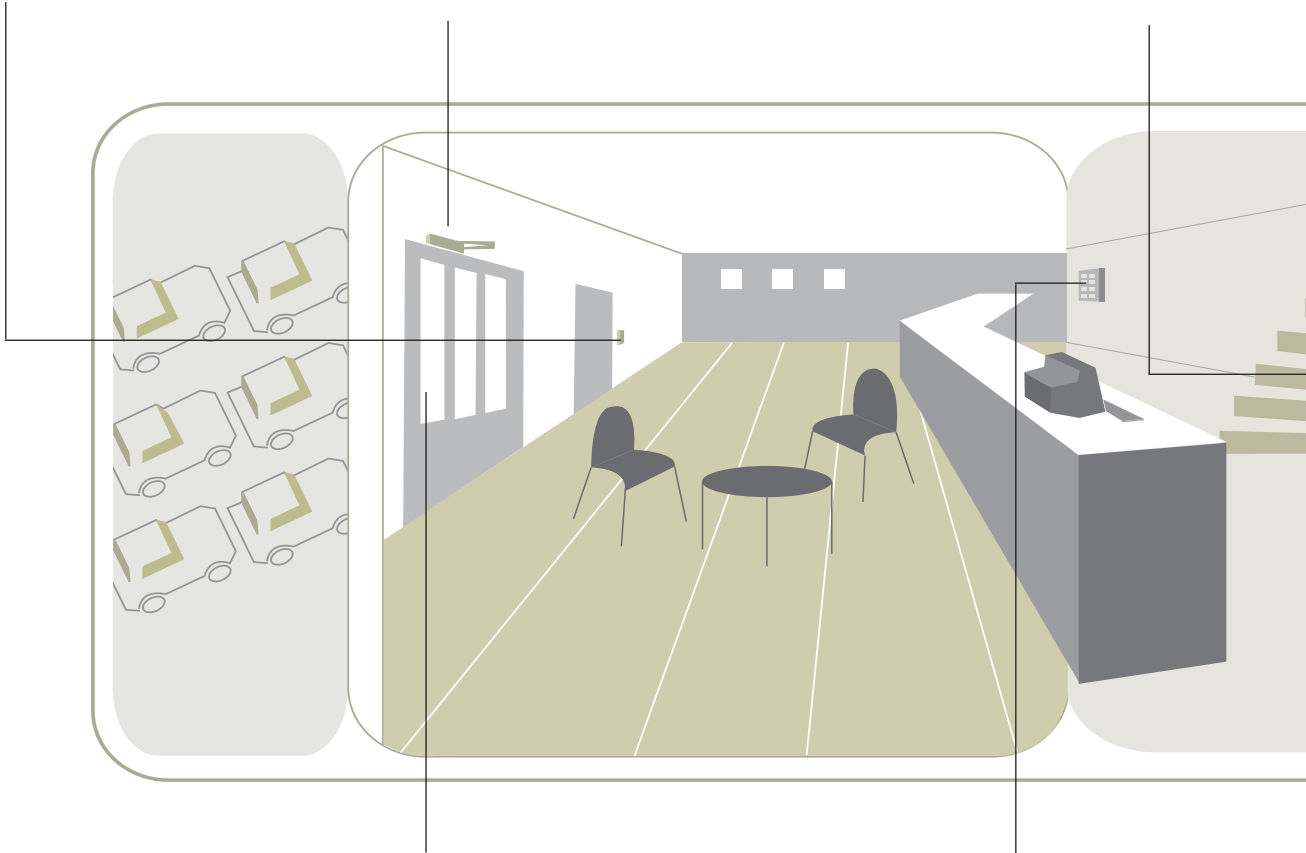

The Door Closer causes the door to close safely. VingCard's high quality Door Closer allows the door to open easily, and close completely, both quietly and securely.

Elevator Controller

VingCard's Elevator Controller is designed to be built into the elevator panel and operates offline. The security level of the hotel will increase, as only guests with a valid keycard will have access to the elevators.

Exit Device

We have combined the VingCard electronic card lock with a push bar from Sargent to provide a complete Exit Device to work with your VingCard electronic card locking system. This makes it possible to use encoded cards to control all guest and staff access to the building, while providing a panic exit device to satisfy all safety considerations for emergency exit. Opening the door from the inside is achieved by simply pushing the push bar.

KeyBox

VingCard's KeyBox assists you in providing secure and cost efficient key management for your hotel. From a central computer, you are able to supervise and track any use of keys on the property. The cabinets are available in various sizes with expanding modules to handle up to 3500 keys.

Door Viewer

When you install a Door Viewer, your guests will be able to identify who is outside before

opening the door. VingCard's high quality Door Viewer with glass lens has a super wide 200° all round clear angle of view.

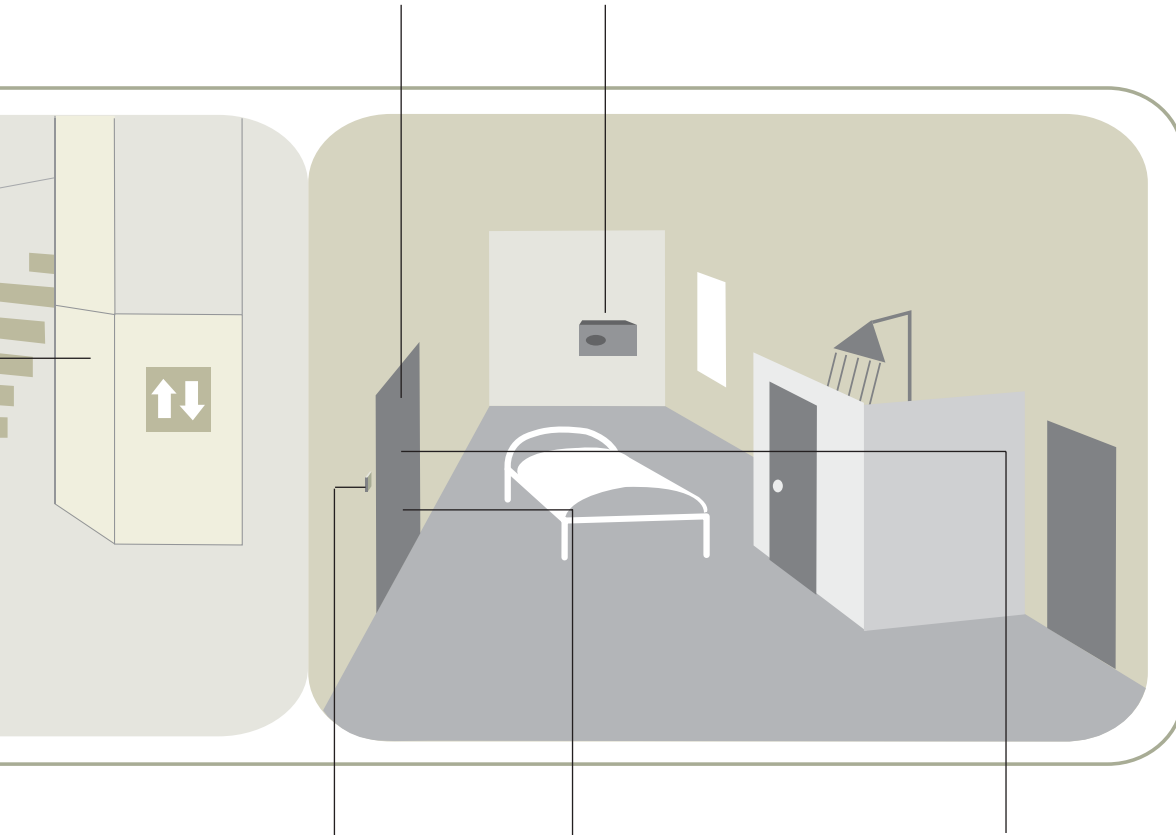

Safe

Elsafe protects your guests' belongings, and your reputation. All travelers, whether on business or pleasure, always carry valuables - money, jewelry or laptops. With an Elsafe installed in the hotel room, there is no need for your guests to leave their belongings unsecured. They just enter

their personally selected code and the safe is closed. Then re-enter the code and the safe opens. By choosing Elsafe, you tell your guest - both the wanted and unwanted ones - that your hotel cares about security!

For more information about Elsafe and the new Infinity Collection, please visit our web-site www.elsafe.com.

Energy Saving Unit

VingCard's Energy Saving Unit helps to reduce energy costs. This simple, low cost device acts as the main electrical switch to the room and is operated by the guest's VingCard room keycard.

The guest inserts the card when entering the room to switch on lighting, heating, and/or air conditioning. This unit has a built in exit time delay of 25 seconds. This gives the guest plenty of time to exit the room before the lights are switched off.

Door Retainer

Our Door Retainer prevents entry of intruders and increases the guest's safety. A door retainer is a minimum requirement needed to obtain safe identification from strangers at your door.

Room Number Plate

Our Room Number Plate is available in the same style and finish as the VingCard card lock ensuring uniform appearance on guestroom doors. The plates can also be enlarged to use on other doors, such as "Private", "Conference Room", "Swimming Pool" etc., and as indication for corridors, i.e. "201-229". Our plates can be customized to suit any environment.
