

DA VINCI, the new card lock from VingCard offers the very best in contemporary design and security technology in combination with extensive, user identifiable, feature packages for maximum operational benefits and guest convenience.

DA VINCI by VingCard is a self contained, battery operated electronic door lock for your guestrooms and perimeter areas. It combines elegance and design with security and safety. The modularity in both hardware and software allows for individual design and customisation of features and functionality.

DA VINCI operates on both smartcard and magstripe keycards and is managed by powerful windows software designed for stand alone use or for integration with PMS and POS systems. In addition it is backed up by exclusive world wide warranty and service programs that will guarantee cost efficient operations and protect your investment in your guests' comfort, safety and security.
