

**NEW v2.0 software
SafeLink compatible**

NEW low profile laptop safe that fits on top of minibars and almost any other room location

The Ultimate Safe for the Securing and Recharging of Laptops

FEATURES

- Ideal size for laptops and other valuables
- Optional internal power outlet for charging of laptops
- Choice of left or right hinged doors

- Full audit trail printout using Elsafe SafeLink
- Highly secure using guest's own 4-digit code
- No keys or cards to lose
- Simple intuitive operation
- LED display confirmation of guest code
- Elsafe's industry-leading electronic override system
- No pre-set factory master code
- Flash-RAM retains all vital security and audit data in memory forever
- Anti-tamper labyrinths
- Proven reliability and support from the world's leading in-room safe manufacturer

Ample room for the latest large screen laptops

Now there is a safe that has been specially designed with ample room to fit the latest large screen laptops, and even an optional internal outlet for recharging their batteries while they are locked securely inside the safe!

No compromise on security

The M28 has all the convenience and high-security features that your guests require, a 4-digit code, LED display and simple intuitive operation.

The Elsafe SafeLink handheld unit allows you to print a full audit trail report, and Elsafe's unique electronic override system provides flexible and powerful security management.

With the SafeLink, you can even print out the last 1,000 SafeLink activities, showing who used the SafeLink, and in which room!

Elsafe's industry leading multi-level password control

Unlike other manufacturers whose safes can be opened using a single worldwide factory-set master code, all Elsafe's are protected by a unique multi-level password control system.

This powerful security feature allows every hotel to set their own unique override code in order to open safes in case of an emergency.

The various levels of passwords provide a securely structured hierarchy in order to control all openings and re-setting of system parameters.

Optional internal power outlet

**NEW v2.0 software
SafeLink compatible**

Elsafe's audit trail can protect your hotel's reputation – and save you money!

The primary advantage of Elsafe's audit trail is that it can be printed out, instantly, in the presence of the guest, using the handheld Elsafe Safelink unit.

If the guest is mistaken, or in cases of attempted fraud, this detailed printout can provide indisputable evidence as to who was the last person to open the safe. This dramatically reduces fraudulent liability claims, saving you both time and money.

In fact, many hotels report annual savings of over 40% on their liability losses after installing Elsafe's with audit trail capabilities.

Improved security management using Elsafe's new SafeLink

Based on industry-standard Windows PocketPC technology, the handheld SafeLink unit makes security management a breeze, with intuitive touch screen operation.

With the SafeLink infra-red linked printer, you can print out the last 100 safe activities and 1,000 SafeLink activities, showing who used the SafeLink, and in which room!

You can rely on Elsafe

With more than 750,000 safes in daily use at over 4,500 hotels worldwide, Elsafe offers proven reliability, supported by a knowledgeable and experienced international service organisation.

Technical Information

Elsafe M28
