

Door Viewer

PRODUCT FEATURES

- Easy to use. Bright image and large aperture.
- Easy to install. Precision machined brass barrel, which requires just one single hole.
- Elegant low profile design.
- Super wide 200° all round clear angle of view.
- Glass lens cover will not scratch like plastic when cleaned.
- Tarnish free finishes: Polished chrome, satin chrome, polished brass, satin brass or antique.
- Superior precision laser cut optics eliminates distortion (fish-eye effect).

Secure your guests

Our door viewer prevents entry of intruders and increases the guest's safety. A door viewer is a minimum requirement needed to identify strangers before opening your door to them. Once an intruder is in - it is too late.

Replace old viewers

Just having any door viewer is not enough. It must be easy to maintain and provide a clear all round wide-angle image.

VingCard's door viewer is suitable for replacing old viewers which have inadequate and narrow field of view. Replace the old viewers, which often have scratched plastic covers and reduced image brightness, with VingCard door viewer.

Safety

VingCard recommends every guestroom to be equipped with our high quality door viewer.

Suitable for all hotels, with or without VingCard locks installed.

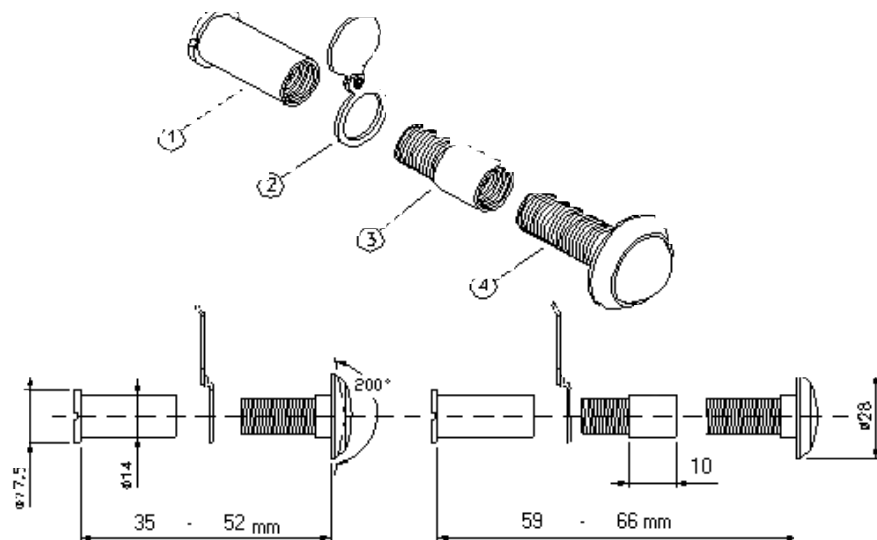

High quality door viewer

Order part no 6000123 for satin chrome viewer.
 Order part no 6000119 for polished chrome viewer.
 Order part no 6000124 for satin brass viewer.
